

# EP096GM-RESULTS

## ■ Multi-Pull system provide shooting clubs

with a complete set of advanced, reliable, modular and easy to install electronic equipments for automatic operation of shooting ranges, results display and competitions management.

## ■ EP096GM - Results management software

if connected to the EP096GM "Data Concentrator", allows to shown on large size monitor (plasma or LCD) results and scores acquired in real time from a competition in progress.

Operation is fully automatic, all results, scores, squads of shooters and other relevant information regarding competition are sent automatically from the EP096GM "Data Concentrator".

In addition to that, it's possible, on the top part of the screen, visualize advertisement, that can be scrolled with a timing previous decided from the operator. Any type of advertisement can be entered.

EP096GM - Results can be an economical alternative to the use of several EP096M monitors for results or can be added to these units in order to have a simple "repeater" of results in many place of the shooting club.

It works through guided instructions for immediate operation and it requires a PC.

## ■ PC Requirements

|                     |                   |
|---------------------|-------------------|
| Windows:            | 98/2000/XP        |
| HD size:            | 5 Gb              |
| Ram size:           | 32 Mb             |
| Speed:              | 700MHz min.       |
| Serial ports RS232: | 2                 |
| Language:           | Italian - English |
