Date 29-01-2021

#### How to connect

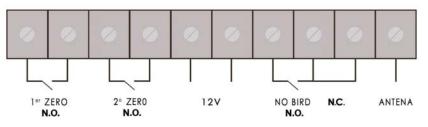

Disconnect the EP095M referee box from the control unit.

# Connect the cable to the panel connector on the side of the receiver box

Connect the two cables coming out from the receiver box, to the referee box

This is the connector for the wires inside the box.

They are already connected, and this will help in case of need for cable damage or modify.

E.P. Elettronica Progetti s.r.l. Traspontina, 25 00072 Ariccia (Roma) – Italy tel.: +39 069342181 fax: +39 069344987 www.elettronicaprogetti.com info@elettronicaprogetti.com

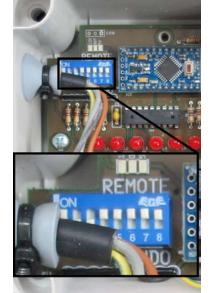

#### How to configure

To configure the device there are some dipswitch to set **before** turning on both the control unit and the receiver.

There are two sets of dip switches to set, one on the remote and two on the receiver box.

This is the remote's dip switch

This is the receiver's dip switch

They both have to be the same, in order to pair them. Any configuration will work.

To enable the No-Bird function, move to ON the dip switch n° 5
