

EP096AG3 Programmer

Multi-Pull

THE SYSTEM FOR SHOOTING
GROUND AUTOMATION

■ EP096AG3 Chip Card Programmer

This unit connects to the PC where the *Multi-Pull* Chip Card Management Software runs and allows to read and write the chip cards that are inserted into it.

The product is therefore composed as a whole both by the reader / writer and by the chip card management software

The operation is immediate, just connect the reader / writer to a USB port of the PC, using an RS232 / Usb adapter and then power it through its power supply supplied with the appropriate jack.

The power supply is supplied with adapters for different types of electrical outlets.

This unit, together with the chip card management software, represents the fundamental position of the *Multi-Pull* system with the use of chip cards. In fact, it is from this station that the operator can insert new shooters in the archive, set different prices based on disciplines and / or athlete types, create Master Cards and operate in a simple and immediate way on chip cards.

■ Technical Characteristics

Dimensions of main console:	39 x 29 x 12 cm.
Weight:	0,5 kg
Input voltage:	110 VAC ÷ 240 VAC / 47 Hz ÷ 63 Hz
Power consumption:	5 W
Operating temp. range:	-10°C ÷ +45°C

Chip Card Management Software

The *Multi-Pull* Chip Card Management Software represents the heart of the chip card system.

It allows multiple activities through easy to learn floating window software. However, a "Help" file helps the manager to immediately understand how it works.

The most important functions are:

- ◆ Select Password for the Club and other operations
- ◆ Select the "maximum value on a chip card"
- ◆ Select the standard value for chip card deposit
- ◆ Select the disciplines (7) and type of athletes (10) and for each a different price
- ◆ Define any "bonuses" for top-ups that exceed certain amounts
- ◆ Create Master Cards with different price lists
- ◆ Manage the athletes archive, possibly importing it from an external file
- ◆ Manage a "black list" of athletes, blocking access to the ranges
- ◆ View the reports by athlete, within a given period and extract all kinds of statistics, by range, by discipline, by athlete, etc., in order to keep under control the economic performance of the Club
- ◆ Configure any EP096AG5-W automatic loaders
- ◆ The credit handled by the chips is expressed in currency with 6 digits (4 fixed and 2 decimal places). The software manages all currencies.

The software supports 9 different languages:

- ◆ English
- ◆ Italian
- ◆ France
- ◆ Spain
- ◆ Deutsch
- ◆ Portuguese
- ◆ Russian
- ◆ Turkish
- ◆ Chinese
