

EP096AG5 W series

Multi-Pull

THE SYSTEM FOR SHOOTING
GROUND AUTOMATION

■ EP096AG5-W Automatic Chip Card Loader

This unit allows to automatically reload the chip cards of the *Multi-Pull* system accepting banknotes and / or coins.

It is made of very sturdy metal with a safety lock.

The banknote reader is able to accept 4 different types of banknotes:

- ◆ € 5 - € 10 - € 20 - € 50

The coin reader can accept:

- ◆ € 0.1 - € 0.2 - € 0.5 - € 1 - € 2

It is equipped with a very bright display where the athlete can view the credit before and after recharging.

The chip card reader is mechanical with a release button for maximum security when reading and writing the chip cards.

The banknote reader can be configured to read not only Euros, but also other currencies, if expressly requested when ordering.

All "movements" are indelibly recorded with date and time in a large capacity non-volatile memory. This allows to know exactly what is being reloaded and avoids fraud attempts.

It is able to discard chip cards with an expiration date that is out of date and attribute "bonuses" based on the total loaded of each athlete, as established by the Manager.

The unit is programmed in a simple and quick way just by introducing in the reader a Master Card which contains all the relevant data for its programming. So it is ready to operate.

■ Technical Characteristics

Dimensions of main console:	34 x 30 x 45 cm.
Weight:	18,0 kg
Input voltage:	110 VAC ÷ 240 VAC / 47 Hz ÷ 63 Hz
Power consumption:	40 W
Operating temp. range:	-10°C ÷ +45°C

Available Models

The automatic chip card loader model EP096AG5-W is produced in different configurations depending on how the reports are to be made and depending on the presence of the coin reader.

The available models are the following:

- ◆ **EP096AG5-W** only banknotes, no coins
- ◆ **EP096AG5-W—C** both banknotes and coins

in turn, each of these two models differs according to the reports as follows:

EP096AG5-W / EP096AG5-W—C no reports:

- ◆ It does not record the reports of the recharge "movements" carried out, it only allows to view the total loaded

EP096AG5-W / EP096AG5-W—C reports with USB Pen Drive or by LAN:

- ◆ It records the reports of the recharge "movements" carried out and allows to:
 - view the total loaded
 - download on a USB Pen drive the reports recorded between two established dates
 - send the reports in real time via LAN to the *Multi-Pull* Chip Card Management Software

EP096AG5-W / EP096AG5-W—C reports with WiFi:

- ◆ It records the reports of the recharge "movements" carried out and allows to:
 - send the reports in real time via WiFi to the *Multi-Pull* Chip Card Management Software

If you want to use the reports produced by the automatic chip card loader EP096AG5-W, you need to use the *Multi-Pull* Chip Card Management Software, which allows the field manager to set the different price lists for each discipline and for different types of athletes, create the Master Card, program the chip cards from a fixed location, collect all reports and extract the statistics necessary to understand the progress of the club.
